

## World Contraception Day

### Teacher Lesson Plan 2: Quiz A, Presentation A, Quiz B and Homework Handout

#### Objectives

- To raise awareness of the need to use contraception
- To educate students about the different contraceptive options available and usage

**Lesson Plan** (two sessions of approximately 45 minutes each)

#### Session 1

Hand out Quiz A to each student to complete at the start of the lesson – it should take them approximately 10-15 minutes to complete. They must not confer.

Once they have completed the quiz, inform them that you are going to go through the answers together and discuss them, and that each student is responsible for marking his / her own quiz as the workshop session is about addressing personal awareness.

Use the presentation (which provides solutions to quiz A) to talk through the correct answers. Encourage student participation and questions, for example, by asking them if they are surprised by the answer.

#### Homework handout

Provide the presentation as a handout to the students and ask them to read it as homework, informing them that there will be a second quiz at the next lesson, which will be marked by another class member. Let them know that they will not be able to refer to the handout or any other reading material during the quiz (quiz B).

#### Session 2

Hand out quiz B to each student to complete at the start of the lesson – it should take them approximately 10-15 minutes to complete. They must not confer or refer to the handout.

Ask the students to exchange their completed sheets with another student.

Go through the answers, again encouraging student participation and questions. Refer to the handout and presentation where necessary.

#### **Accompanying Lesson Materials:**

- Quiz A
- Presentation A (answers to quiz A)
- Homework handout (a presentation)
- Quiz B
